Re: Public Comment Form
Comments relating to Boulder Gulch
Route ID Numbers **HN478, Missing Route, HN476, HM465**

Dear Sirs,

I am opposed to the closing of Boulder Gulch Trail and the following Routes

HN478 and HN476 are closed on Maps C & D and are part of a cut across route that saves time to reach Boulder Gulch

Between them lies a connector trail missed by BLM, but turned in by the Havasu 4 Wheelers prior to December 31, 2005. All of these routes are maintained and used regularly by Extreme Jeeps.

HN 465 is Boulder Gulch, Limited to Administrative uses on Map C and Open on Map D. This route should be open and designated a technical area. It consists of very large boulders and requires lifted & locked jeeps with 35+ inch wheels. BLM does not have a vehicle that could drive it to meet Administrative duties. I wondered why it was designated limited until I accidentally found Map 36 Record of Decision, which suggests it be handled as part of a "managed in a Wilderness Way" a rather vague catch all to close more land as Wilderness even though it is not so designated. It does not show as such on Maps C or Map D making me wonder if this was accidental or on purpose.

I hereby request Boulder Gulch HN 465 and its connector routes HN 478 and HN 466 as well as the unnumbered route between be left open & called a technical area.

Boulder Gulch Trail
